

AutomationSolutions Automation Resource Center (ARC)

Complete Turn-key Systems

Emphasizing Motion Control and High Technology Sensor Solutions

Successful turn-key solutions result when machine automation products are combined with appropriate ARC engineering services. Usually motion technology and /or high-technology sensors including machine vision are the major ingredients in turn-key solutions.

AutomationSolutions has four strategically located Automation Resource Centers. Each offers turn-key solutions incorporating many of the following attributes:

- Multi-axis control solutions
- Complex motion solutions
- PC-based soft control solutions
- Complex PLC solutions
- Machine vision solutions
- Laser technology solutions
- Creative engineering solutions
- High-level programming assistance
- Flexible manufacturing scheduling
- Custom assemblies and product modifications
- Custom design and prototyping
